Cobalt Levels in Sprinter Gold® Results Plus™

Sprinter Gold® Greyhound Products wish to advise greyhound trainers and owners that our trace-mineral and vitamin supplement Sprinter GOLD® Results Plus™ contains cobalt (as cobalt sulfate). Greyhound Racing authorities have recently introduced a urinary cobalt limit for greyhounds.

Due to concerns expressed by many trainers about the level of cobalt in Results Plus™, we have decided to recall Sprinter Gold® Results Plus™ in all sizes for batches:

- 0508153 - 0508156 with Aug 17 expiry
- 1506151 - 1506153 with Jun 17 expiry
- 1304151 - 1304153 with Apr 17 expiry
- 0902152 - 0902155 with Feb 17 expiry

We invite all customers who have any Results Plus™ product to contact our **Freecall number 1800 112 227** for instructions on how to return the product for a full refund at the recommended retail price for the product size they have purchased.

Results Plus™ will be evaluated for re-formulation and new product dosage instructions will be issued to ensure that users of our Sprinter Gold® range can be confident that Results Plus™ is compliant with the latest Greyhound Racing regulations.
